## AAPC Announcements

### Happy Member Appreciation Month!

Because of you, AAPC has been able to impact the lives of more than 180,000 healthcare professionals for 31 years. Celebrate with us on [social media](#) with trivia and giveaways. Spread the word and let your colleagues know they are appreciated.

### CEU Corner

AAPC awards CEUs for two types of education or 'Curriculum', these are [Curriculum A](#) and [Curriculum B](#).

[Curriculum A](#) education focuses on the technical side of professional medical coding, and the CEUs are always approved for AAPC's core credentials which are CPC, CPC-O, CPPM, CPB, CPC-P, [CIC](#) and [COC](#).

[Curriculum B](#) education addresses general business skills related to the healthcare field, such as stress management, communication skills or organization of time, etc.

Naturally, because [Curriculum A](#) education is information that pertains to the coding/medical profession, those CEUs will also be approved for some specialty credentials depending upon the level of education, the qualifications of the presenter, and the description of the education that is provided.

[Curriculum B](#) education applies to its own category. Certified members can use [Curriculum B](#) CEUs for up to 33% of their required CEUs per renewal. Therefore, if one core credential is held, 12 of the 36 CEUs due every two years may be from [Curriculum B](#) education.

We encourage you to visit the [CEU Information-Members page](#) for further details.
